# 5 Crypto Coins Everyone Should Own!

ZenectWealth.com

By David Goldstein

# CryptoCurrency

10 years ago, few people had heard of cryptocurrency...

Heck, the first bitcoin wasn't minted until January 3, 2009.

What I find crazy is, the first decade of cryptocurrency started off as a fringe investment idea. Everyone, myself included, thought it was a joke, or a scam. Many people asked when this "thing" would collapse.

Oh how times have changed.

The price of Bitcoin is now regularly quoted along with the S&P 500 and the Dow Jones Industrial Average.

There are hedge funds trading crypto. There are ETFs holding crypto. There's a crypto futures market now...

And, there are even crypto focused brokerages and exchanges: Hello Coinbase, Robinhood, and about a dozen others!

What I'm saying is crypto is here to stay.

But the big question is what to buy...

## **Buy these 5 Crypto Coins Now**

The first thing I'm going to say is watch your back.

The Crypto world is full of fraudsters. It's the wild wild west of trading.

The entire market is unregulated... and that means no-one is there to help or protect you if things go sideways.

The news is filled with people losing lots and lots of money in Crypto... And there's even more stories that go unreported.

The market is volatile. The Coins are complex.

So, Before you buy anything (even stuff I recommend) do your damn research. Make sure you understand what you're investing in and why!

Remember nobody will care for your money more than you...

Ok, one last disclaimer... (my lawyers require this) - I'm Biased. I OWN The five Crypto Coins I mention below. Yep, I bought them. I Own them. I make money if they go up. And I can sell them at any time without warning... or buy more!

Ok, now that you know how the table is set... lets get to my favorite coins...

# 5 Crypto Coins To Buy Today.

Here we go...

## **Coin #1 - Bitcoin (BTC)**

Bitcoin is the granddaddy of Crypto Coins. You can't build a portfolio without some of these coins.

## **Coin #2 - Ethereum (ETH)**

Ethereum is the Queen of Crypto... as I write, the second largest coin by market cap, and used for a whole host of things - especially DeFi.

## **Coin #3 - Solana (SOL)**

Another BIG coin out there in the world. This coin's claim to fame is it processes transactions quickly and cheaply - when compared to ETH.

## **Coin #4 - Polygon (MATIC)**

This coin is tied to ETH, as a "side chain". There's a whole Network of people using this coin to create smart contracts.

## **Coin #5 - Uniswap (UNI)**

UNI is another coin tied to ETH and used for smart contracts. It is one of the first movers in the DeFi space.

There you have it... 5 crypto coins to start buying today.

Are there others? Of course.

There are hundreds of crypto coins... and new ones are being created each day.

Dip your toe in the market. Buy a little here and there... and learn all about how the crypto markets work.

You won't be disappointed.

Good Trading,

David Goldstein

FOR EDUCATIONAL AND INFORMATION PURPOSES ONLY; NOT INVESTMENT ADVICE.

This report and all of our products, emails, blog posts, social media posts and content are offered for educational and informational purposes only and should NOT be construed as a securities-related offer or solicitation or be relied upon as personalized investment advice.

Our company, employees, and contractors, are NOT financial advisors, registered investment advisors, or a Broker/Dealer. We do not offer or provide personalized investment advice. Although our employees and contractors may answer general customer service questions, they are not licensed under securities laws to address your particular investment situation. Nothing in this report, nor any communication by our employees or contractors to you should be deemed as personalized investment advice.

There is a risk of loss in all trading, and you may lose some or all of your original investment. Results presented are not typical.

Past performance is no guarantee of future results. All information is issued solely for informational purposes and is not to be construed as an offer to sell or the solicitation of an offer to buy, nor is it to be construed as a recommendation to buy, hold or sell any security. All opinions, analyses and information contained herein are based on sources believed to be reliable and written in good faith, but no representation or warranty of any kind, expressed or implied, is made including but not limited to any representation or warranty concerning accuracy, completeness, correctness, timeliness or appropriateness. Investments recommended in this publication should only be made after consulting with your financial advisor.

Examples in these materials are not to be interpreted as a promise or guarantee of earnings or profits. Earning and profit potential is entirely dependent on the person using our product, ideas and techniques. This is NOT a “get rich scheme.”

Your level of success in attaining the results claimed in our materials depends on the time you devote to the program, ideas and techniques mentioned, your finances, knowledge, and various skills. Since these factors differ according to individuals, we cannot guarantee your success or income level. Nor are we responsible for any of your actions.

Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading.

For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Owners, management, employees, contractors and members of their family, affiliates, and agents may hold stock in profiled companies, some or all of which may have been acquired prior to the dissemination of this report. They may buy or sell stock in profiled companies at any time with or without notice. We may benefit from any increase in the share prices of profiled companies.

There is an inherent conflict of interest in our statements and opinions and such statements and opinions cannot be considered independent.

Through the use of this email, article, report, or website you agree to hold our company, our owners, management, employees, contractors, affiliates, and agents harmless and to completely release them from any and all liability due to any and all losses, damage, or injury monetary or otherwise that you may incur.

Information contained in our emails and on our website contains "forward-looking statements." Subscribers are cautioned not to place any undue reliance upon these forward-looking statements. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, goals, assumptions or future events or performance are not statements of historical facts and may be "forward-looking statements". Forward-looking statements are subject to a number of risks, known and unknown, that could cause results or operations to differ materially from those anticipated. We have no obligation to update forward-looking statements. Some of the statements and financial projections contained in the material are forward-looking statements and not statements of fact.

Forward-looking statements are generally accompanied by words such as "intends", "projects", "strategies", "believes", "anticipates", "plans", and other terms which convey the uncertainty of future events or outcomes. No assurances are given that such expectations will prove to have been correct. Readers are cautioned not to place undue reliance on forward-looking statements

Specific financial information, filings and disclosures as well as general investor information about publicly traded companies, advice to investors and other investor resources are available at the Securities and Exchange Commission website (<http://www.sec.gov>) and (<http://www.nasd.com>)

Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing

ones' financial security or lifestyle. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results.

If you trade options, we recommend you read and fully understand all the information contained in the Characteristics and Risks of Standardized Options. It's also known as the Options Disclosure Document and it explains the characteristics and risks of exchange traded options.
